for a free demonstration of the  
iServer product suite

Business Blueprint is the project phase during any SAP implementation or upgrade when you capture the enterprise's requirements and define how your business processes and organizational structure are to be represented or 'realized'.

It goes without saying that, like any requirements gathering activity, SAP Blueprinting is essential to the success of the resulting SAP implementation and project success.

### Who Will Benefit from the SAP® Blueprint Accelerator?

**SAP® Process Analysts and Functional Consultants** will benefit from a collaborative modeling environment and set of analysis tools for producing optimized business Blueprints

**SAP® Accelerator Architects** can better understand SAP Blueprints produced and meet requirements

**SAP® Process Owners and Subject Matter Experts** benefit from a better aligned SAP accelerator to manage and automate their core operational processes

**SAP® Project Leads** benefit by implementing SAP within project budgets and timescale objectives

Orbus has a global reach which means we can serve and support customers in every major global region. Headquartered in London, UK, we also have regional offices in the USA, Australia and South Africa.
