iServer Portal allows teams to smake repository content available in HTML 5 format through a dynamic, business-friendly and web-based portal. Business users can browse, review and search for diagrams and documentation via a platform that is easy to use and accessible from any internet browser. Users can also drive continuous improvement by posting their comments and feedback in real time.

Additionally, Portal offers unlimited access for business users, including cross-platform support, making Portal a very cost-effective way of enabling Stakeholder engagement.
