

iServer Consultancy Services:

Advisory and Strategy

Overview

Extract maximum value from your iServer investment with best-practice advice and implementation guidance. In enterprise architecture, whether you're adopting a new use-case, facing configuration issues, or implementing a new framework and reference model, strategy is king. Define and plan your business transformation by leveraging the extensive knowledge and first-hand experience of Orbus consultants.

What We Offer:

Tool Configuration

Leverage our consultants' experience and optimally configure iServer. We provide guidance on metamodeling, metadata, reporting, and adapting the tool experience for different stakeholder needs.

Working Best Practices

Get tailored best-practice guidance on working day-to-day with iServer; topics include repository governance, data management and integration advice. Exploit the working best practices that will enable you to get the most out of iServer, regardless of the situation or challenge you are facing.

Scenario and Use-Case Guidance

With so many ways to use iServer, it's vital to understand the shortest route to achieving your objectives, given a particular architectural or domain-based use-case. Explore, and get guidance on, a variety of examples including architectural state management, application rationalization, process optimization and strategic portfolio management.
