iServer

iServer Consultancy Services:

Strategic Portfolio Management

What's Involved?

Each scenario follows the same easy-to-follow format and includes an overview, a conceptual method of approach, analysis and a practical exercise. In taking the course you will gain insight into strategic portfolio management and the fundamental role it will play in your digital transformation.

The five scenarios covered are:
- Establishing application support for strategy
- Management of application lifecycle
- Management of application cost
- Application rationalization
- Protection of data

In the format of a collaborative and interactive workshop, the course takes place over a full day. Although no prior knowledge of iServer is necessary, it would be beneficial to have a basic grounding before participation.

Key Enterprise Architecture Team Benefits:

- Gain a thorough understanding of the Orbus SPM solution
- Get clarity on how to approach five critical scenarios
- Receive detailed guidance on required data structures to drive analysis

Key Business Benefits:

- 'Hit the ground running' with the SPM Solution
- Expedite time-to-value of the SPM Solution for IT
- Answer and solve business critical questions

Overview:

This one-day course provides an overview of Orbus Software's **Strategic Portfolio Management** Solution, and its use in addressing five common scenarios. It will provide you with the foundational knowledge required to understand the purpose of strategic portfolio management (SPM), and how it fits with iServer, related modules and Microsoft Power BI.
