

Business Portfolio Management

Bridge the gap from strategy to execution by assessing the health of your business capabilities

Aligning the business strategy with the day to day challenges faced by staff on the ground requires complete visibility of all capabilities, processes and operating functions. iServer's business process management solution provides transparency across the enterprise landscape, allowing you to analyze various dependencies and relationships, and ensure high ROI projects are delivered on.

Answer the fundamental questions with iServer's rich interactive dashboards

How mature are your organization's capabilities?

How well are processes performing and how can you improve them?

Which processes handle personally identifiable information?

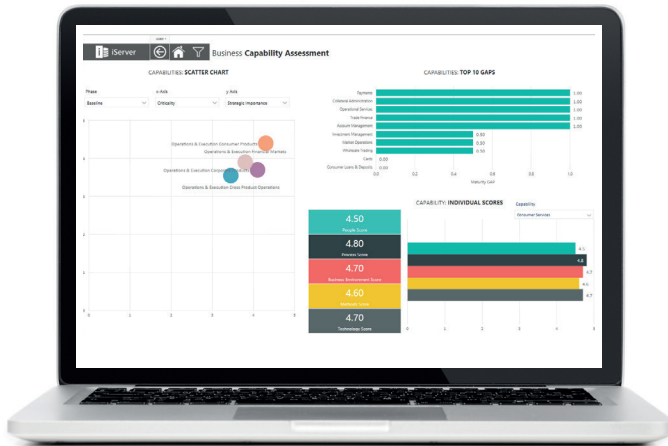

The BPM dashboards are driven by predefined views in the iServer repository and rendered using Microsoft's Power BI.

Business Portfolio Management

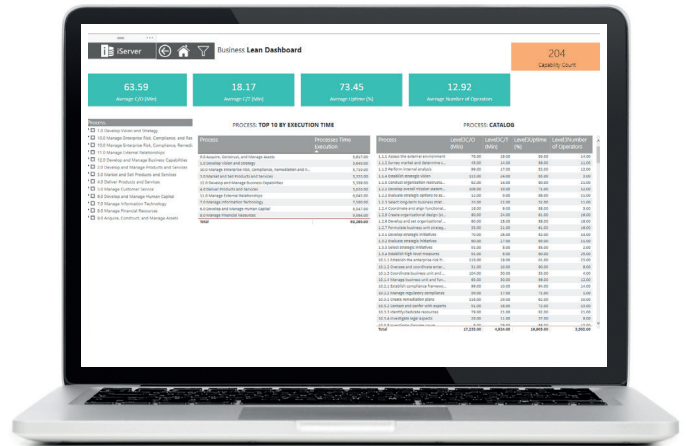

Business Capability Assessment

Highlight the maturity and criticality of business capabilities.

Business Lean

Analyze the performance of all your processes.

Business Data Assessment

Identify all functions that handle personally identifiable information.
