

Project Portfolio Management

Prioritize the IT projects and programs needed to deliver strategic change

Effective project portfolio management (PPM) lets you visualize the project landscape, track portfolio performance against strategic goals, investigate issues and make the right decisions first time, every time. iServer's PPM solution ensures you have the requisite dashboards and reports to visualize your enterprise landscape and the required changes to drive strategic change.

Answer the fundamental questions with iServer's rich interactive dashboards

What are the estimated benefits of my projects versus the realized benefits?

What is the strategic importance of my projects?

Which elements in other portfolios does the project impact?

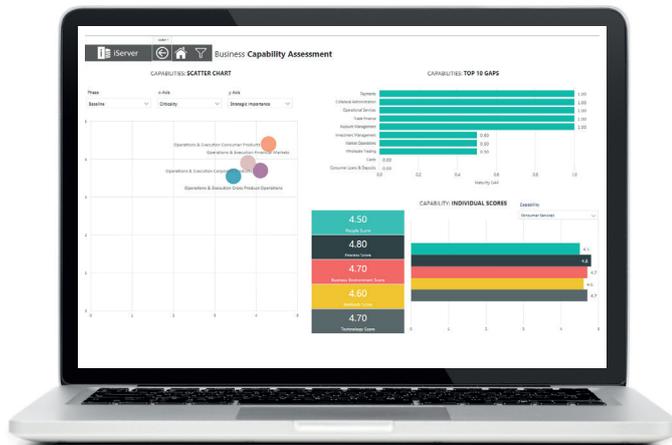

The PPM dashboards are driven by predefined views in the iServer repository and rendered using Microsoft's Power BI.

Project Portfolio Management

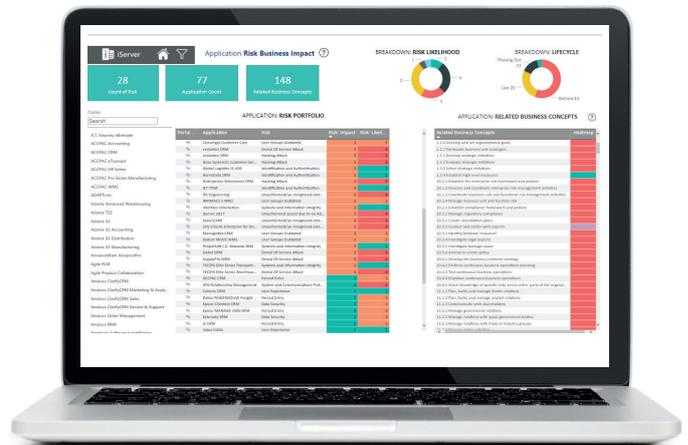

Project Benefit

Track how your project portfolio delivers against the anticipated strategic benefits.

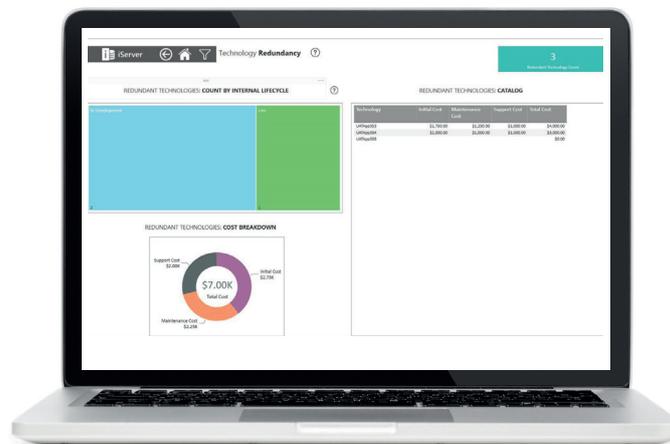

Project Strategy vs Risk

Prioritize projects by their strategic importance.

Project Impact

Understand the impact of any given project on other elements of the portfolio.
