Technology Portfolio Management

Proactively govern and optimize your technology portfolio to support the business

Technology portfolio management (TPM) provides holistic visibility of the entire enterprise, facilitating up-to-date metrics and analytics. iServer's TPM solution enables you to measure return on investment, track the total cost of ownership, optimize your tech stack and mitigate risk.

Answer the fundamental questions with iServer's rich interactive dashboards

? Which technologies are you highly dependent on?

? Which technologies are redundant?

? What are the most adequate standards for your organization?

Stakeholders:

- CTO
- CIO
- Program Manager
- Project Manager
- Enterprise Architect

The TPM dashboards are driven by predefined views in the iServer repository and rendered using Microsoft's Power BI.

Technology Portfolio Management

Technology Vendor Risk

Recognize the risk posed by certain infrastructure components.

Technology Redundancy

Identify system software with overlapping functions.

Technology Standards Assessment

Identify incompatible technology.
