# OrbusSoftware

The Internal Business Case for Standardized Process Modeling

Standardized process modeling facilitates the management of an organizations capabilities, demonstrating the interaction of all components, processes and technologies within the business.

Standard Process Modeling Timeline

Week 1 — Establish Goals; Identify and Load Business Processes

Week 2 — Link Processes to other Enterprise Data and Train Users

Week 3 — Visualize and Analyze Process Data

Week 4 — Communicate and Socialize

Business Benefits

If an organization follows these steps, within four-weeks the C-Level can expect to receive the following benefits:

- Visible processes that realize the delivery of business capabilities in a consistent fashion

- Streamlined operations through process improvement and waste reduction
-
- Clear understanding of how technology, people, and information support business processes
