**Orbus**Software

The Internal Business Case for Technology Business Impact Analysis

Against a backdrop of technical disruption and innovation, changes in an organization's strategy can have radical implications for its architecture. The organization must find a way to see what effect of any architectural change, before it actually takes place. Doing so will future-proof the enterprise against new innovations and enable business to make the right decision at the right time.

Technology Business Impact Analysis Timeline

Week 1	Week 2	Week 3	Week 4
Centralize Architecture and Impact Analysis Data	Load Data and Identify Cross-Layer Links	Visualize and Analyze Your Change Impact	Communicate the Results

Business Benefits

If an organization follows these steps, within four-weeks the C-Level can expect to receive the following benefits:

- End-to-end traceability; ensuring alignment of IT and operations, ensuring everyone is working towards the same strategic goals

- Identification and management of technical risk for the wider business

- Increased agility and better roadmapping ensures IT can meet growing business demands
