Make **ArchiMate** work for you with **iServer**

Hundreds of organisation use iServer's support for ArchiMate to enable standardisation across a wide range of business and IT initiatives. Here are some examples:

VATTENFALL

Vatenfall: Digital Transformation Initiative

iServer provided a secure, easily governable, feature-rich central repository with standardized documentation and also promoted best practices through alignment with widely used standards and frameworks such as ArchiMate

Cambridge Assessment: Reducing IT Complexity

iServer plays a part in all IT projects, as it provides the valuable diagrams to accompany the necessary documentation. The repository offers great functionality for building and managing an architecture thanks to its framework alignment with ArchiMate and BPMN
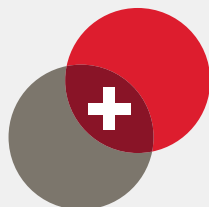

Cambridge Assessment

Kellogg's

Kelloggs: Application Rationalisation Project

iServer allows architects to safeguard the integrity of content, accelerated standards (ArchiMate and BPMN) alignment, and enables them to create an official nomenclature and documentation templates

GS Forsikring: Achieving GDPR Compliance

iServer's ArchiMate allowed them to model the data flows with great ease and register significant progress. This empowered them to finalize the initial stage of their GDPR initiative – obtaining a reliable picture of their data landscape

GF FORSIKRING

Canton of Jura: Establishing an EA Practice

iServer has allowed the team to build an efficient and transparent EA Practice and the most important change is the centralization and standardization of the architecture through enhanced governance and alignment with ArchiMate
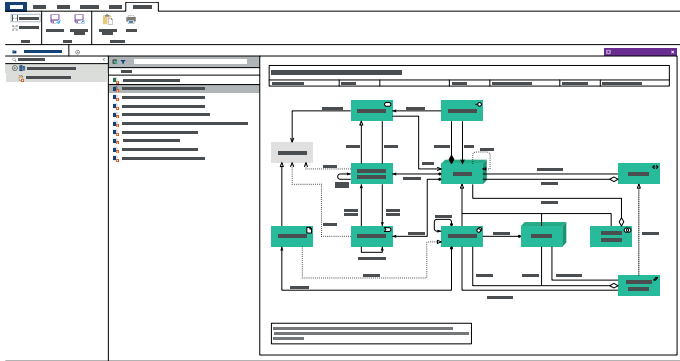

Woodside Energy: Business and IT Alignment

Selected due to the use of Microsoft Office and Visio, iServer also offered full TOGAF and ArchiMate alignment, allowing the placement of tight controls and standardization across business projects
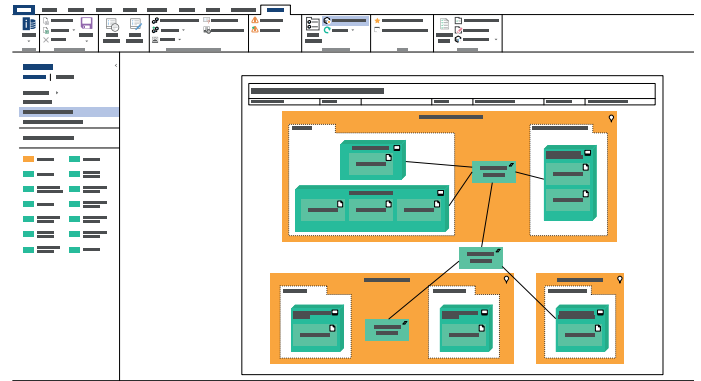

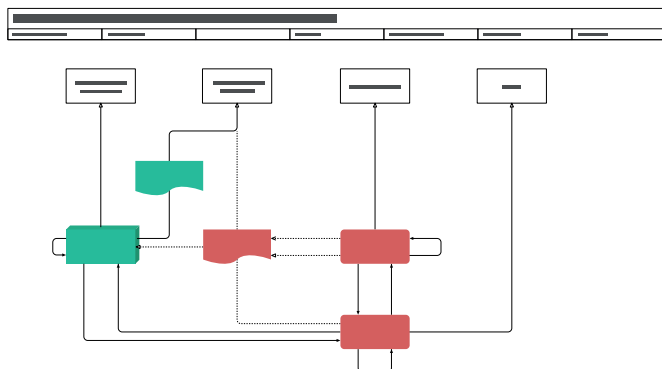

Woodside

ArchiMate Accelerator
