

IT Governance Accelerator

Govern your IT function effectively for improved company-wide performance

Why the IT Governance Accelerator?

- Enables business stakeholders to enjoy a faster Time to Value when implementing projects that involve the IT function
- Allows architects to build a systematic IT governance practice following the COBIT 5 standard
- Provides management with a clear strategic direction that adequately balances opportunity with technology risk

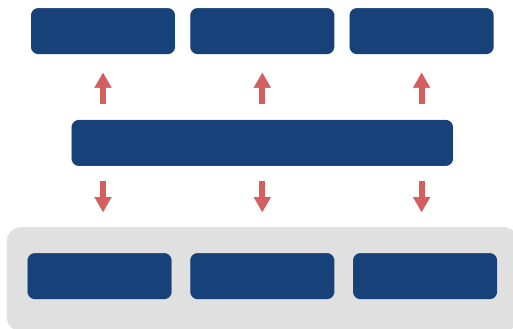

What Does it Offer?

The IT Governance Accelerator is a package containing all the tools required to implement a solid governance capability that aligns to COBIT 5, a mainstream, enterprise-level IT governance and management framework. Instead of wasting time and resources building a COBIT 5-aligned architecture from scratch, you can opt to receive iServer already aligned to the framework. This includes a COBIT 5 repository, meta-model, and documentation, together with a number of tools that enable you to take ownership of the governance function immediately.

IT Governance Accelerator

Features

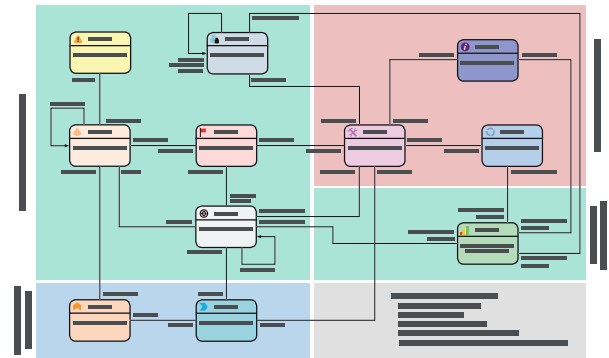

COBIT 5-aligned Repository Structure

The iServer repository folder structure is aligned to the COBIT 5 Principles.

COBIT 5 Meta-model

iServer comes preconfigured with a COBIT 5 meta-models, including all object and relationship types defined in the official specification.

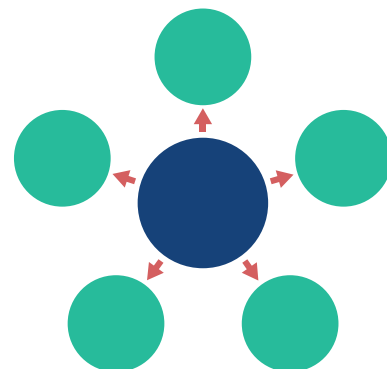

Custom COBIT 5 Notation

Access to a custom COBIT 5 modeling notation created by Orbus Software that is used to describe the meta-model.

Complete Set of COBIT 5 Principles & Concepts

iServer comes preconfigured with a complete set of COBIT 5 Principles and Concepts available as models, together with relationships and interdependencies
