

**1**  
Lead your company's digital transformation don't facilitate it.

**2**  
Customer experience – Stop talking about it and start living it!

**3**  
Put software and data analytics at the centre of your company: the Internet of Things challenge

**4**  
Do everything faster

**5**  
Give your developers the gift of agility

**6**  
Recommit to the most important IT acronym: HR

**7**  
Put what data you can in the cloud – to shore up security

**8**  
Start closing or consolidating your own data centers

**9**  
Figure out what artificial intelligence can do for your company and organization

**10**  
Finally lay out a plan for escaping the 80/20 trap
