

# OrbusInfinity Government:

## The Only IRAP-Assessed Dedicated Enterprise Architecture Platform

### Secure, sovereign, and purpose-built for Australian government transformation

The Information Security Registered Assessors Program (IRAP), managed by the Australian Cyber Security Centre (ACSC), is the Australian Government's standard for assessing the security of ICT systems and services used by government entities.

First assessed in 2023, OrbusInfinity Government has now completed a second IRAP assessment in 2025 to **PROTECTED level – the highest standard available** for commercial cloud platforms in Australia. This enables government teams to confidently adopt secure, compliant technology that meets IRAP PROTECTED standards, while streamlining procurement to accelerate time to value.

OrbusInfinity Government: IRAP Assessed is **the only dedicated enterprise architecture platform** with an IRAP assessment, underlining our continued commitment to meeting the security and compliance requirements of Australian government and other highly regulated industries.

### Key information

- ✓ **Renewed in 2025**  
OrbusInfinity Government: IRAP Assessed has been assessed by IRAP in 2023 and 2025.
- ✓ **Australian data sovereignty**  
Hosted on a dedicated Australian Microsoft Azure for Government cloud tenancy, with all data processed and stored in Australia.
- ✓ **Exclusively for Australian government and highly regulated industries**  
The only dedicated enterprise architecture platform with an IRAP assessment.
- ✓ **Proven security**  
Independently assessed as effective against all applicable ACSC Essential Eight strategies and over 96.9% of IRAP PROTECTED controls.
- ✓ **Assessed to PROTECTED level**  
Securely process highly sensitive personal and operational data.
- ✓ **Trusted by government**  
Over 60 Australian government agencies already rely on Orbus Software, supported by 20+ years of global experience serving public sector clients.
- ✓ **Proactive monitoring**  
Real-time threat detection and response delivered by Rapid7 and Orbus Software.

“ Orbus Software has made significant investments to achieve an outstanding IRAP result, setting itself apart as an industry leader among cloud service providers. ”

**Damien Pumphrey**  
Company Director, CBR Group

local support**

**99.99%  
uptime**

**Gartner® Customers'  
Choice™ for 8 years  
running**

**Highest rated  
EA tool on Gartner®  
Peer Insights™**

## Bringing enterprise architecture to government

OrbusInfinity Government: IRAP Assessed empowers government agencies to manage and protect sensitive information while leveraging the benefits of enterprise architecture (EA). By enabling organizations to collate and analyze data across all activities, and map existing processes and technology, EA helps accelerate decision-making, prioritize investments, identify redundant systems, and optimize resource allocation. This holistic approach ensures government departments can deliver more with less – improving transparency, accountability, and service outcomes for citizens, all while maintaining the highest standards of security and compliance.

## Wide range of use cases

- Government transformation
- Digital service modernization
- Technical debt management
- Accelerated service delivery
- Citizen experience enhancement
- Operational efficiency
- Proactive compliance and risk management
- Policy reform enablement
- Centralized digital service models
- Technology standardization and rationalization
- Landscape mapping
- EA governance
- Sustainability

## Key benefits for government teams

- ✓ **Procurement simplicity and speed**  
Pre-completed IRAP Assessment to PROTECTED level streamlines procurement, enabling agencies to onboard faster and reduce project delays.
- ✓ **Cost reduction**  
Eliminates high costs and complexity of legacy on-prem or ITSM tools, freeing budget to focus on innovation.
- ✓ **Operational efficiency**  
Streamlines EA operations by enabling EA teams to collaborate in a unified central platform in real time, across a broad range of use cases.
- ✓ **Enhanced security and proactive threat monitoring**  
Guaranteed data sovereignty within an Australian Microsoft Azure for Government cloud, with robust end-to-end security and proactive risk monitoring provided by Rapid7.
- ✓ **Collaboration and engagement**  
Breaks down organizational silos, enables real-time collaboration across business, IT and executive stakeholders, and empowers cross-agency knowledge sharing.
- ✓ **Service delivery**  
Centralizes EA data and automates ingestion and reporting to accelerate service design and delivery, empowering project stakeholders to make faster, data-driven decisions.
- ✓ **Data-driven insights**  
Enables data-driven decision-making with templates and AI-powered dashboards, giving stakeholders clear, targeted insights and real-time visibility into business and technology landscapes.
- ✓ **Modern and accessible**  
Access the cloud-native platform anywhere with an internet connection. Remote and hybrid teams benefit from up-to-date application support, and can easily expand use cases, leverage templates, and access a central repository instantly.
- ✓ **Service modernization**  
Drives digital, workforce, policy, and citizen experience transformation effectively with a platform built for rapid change, flexibility and compliance.

Orbus Software is the **only** dedicated EA provider with an IRAP assessment
